FACULTY OF MATHEMATICAL SCIENCES  
UNIVERSITY OF DELHI  
DELHI-110007**

**RANGOLI DAY: REPRESENTING THE BEAUTY, SPIRITUALITY AND HISTORY**

**Date:** 9<sup>th</sup> November, 2023

**Location:** College Premises

With Diwali approaching, the Heritage Club, Department of Statistics, University of Delhi organized a rangoli-making event in the Department premises to observe the festival of lights.

Rangoli, which symbolizes beauty, spirituality, and history, is still an essential component of Indian culture. It symbolizes the spirit of joy, harmony, and inventiveness, and its value extends beyond simple decoration.

This event aimed to understand and appreciate rangoli thereby honoring the cultural heritage and values it encompasses. A peacock-themed design was selected as it represents nature, and auspiciousness and holds symbolic spiritual significance as depicted in various instances in Hindu mythology.

The captivating process of making the rangoli made everyone ponder the significance of art in establishing a spiritual connection. Professors of the department were actively involved in the process and guided the students throughout the process.

As the event was close to completion, the Professors lit the diyas thus concluding an enriching experience for everyone involved.
