## RANGOLI MAKING 2024

**Date** : 23<sup>rd</sup> October 2024

**Venue** : Department Of Statistics

**Time** : 02:30 P.M.

With the auspicious occasion of Diwali round the corner, the Heritage Club, Department of Statistics, University of Delhi on October 23,2024,organized a vibrant rangoli-making event in the Department premises in order to celebrate the festival of lights .

Rangoli holds a very special place in Indian culture. With its roots embedded deep in our history ,it symbolizes festivity and is believed to invite blessings from the divine. Rangoli fosters a sense of togetherness and brings out the true essence of Indian culture. More than just a decoration ,it lights up the entire celebration in true sense.

The event started at 2.30 in the afternoon in the presence of a few students from the department and Heritage student co-ordinators along with Heritage teacher co-ordinators and other faculty members. The Department premises and surrounding areas were first decorated with garlands. A vibrant peacock themed rangoli was then crafted near the stairs by the students with active guidance and help of the professors. Smaller rangolis were also made near the flower pots and Diyas were placed around the department. Our respected Professor Ranjita Pandey then lit the middle Diya and then other faculty members took their turns lighting the others. The event then came to a close but not before Professor Ranjita Pandey had enlightened everyone with her words of wisdom.

The event was a resounding success as it drew everyone's attention to the amazing cultural heritage our country possesses.
